

NEW & REBUILT HAMMERMILL ROTORS

Quality Replacement Rotors... and more!

Whether you require brand new replacement rotors, or to rebuild your existing rotors, Granutech-Saturn Systems has the capabilities to deliver!

- Disc rotors
- Spider rotors
- Ringmill rotors
- Specialty rotors
- Rotor parts including discs/spiders, shafts, bearings, etc.
- Hardfacing

*If your recycling facility operates a hammermill, you will be faced with **rebuilding** or possibly **replacing** your rotors at regular usage intervals, to maintain optimal performance.*

GRANUTECH - SATURN SYSTEMS IS YOUR ONE-STOP, RELIABLE SOURCE FOR NEW OR REBUILT HAMMERMILL ROTORS!

The Granutech-Saturn Systems Product and Services solution:

Granutech-Saturn Systems (GSS) has been in the shredding business for more than 40 years. What you may not know, is that GSS not only provides quality replacement rotors and parts for its own machines, but also for those made by other leading OEM's. Granutech-Saturn Systems' state-of-the-art production facility also includes a complete machine and tooling operation, all conveniently located in the heart of the Dallas, Texas area. As a result, we not only have the capability to design key parts and subsystems for our own machines, but can also support customers with other hammermill brands.

GRANUTECH-SATURN SYSTEMS...

DELIVERING SPECIALTY ROTOR REBUILD SERVICES

GSS has a state-of-the-art vertically integrated machine and tooling operation, MAC Machine & Gear, the largest and most capable in North Texas.

GSS can provide custom manufactured parts, including rotors for other manufacturer products. The variety of needs and options are too varied to be specific about anything except our capabilities. Depending on the complexity and quantities ordered, deliveries of your replacement rotors can be made in as little as a week.

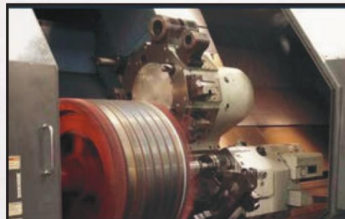

QUALITY... RELIABILITY... SERVICE

MAC Machine & Gear provides custom machining services to OEMs, MROs, and replacement part manufacturers for their large component or complex part projects. We can prepare parts for shipping anywhere in North America or Internationally. We understand the challenges of designing, engineering, and manufacturing large components and work with each client to ensure that your part will meet or exceed expectations for quality, price and delivery.

With a combination of large CNC and manual horizontal boring mills, we can handle jobs big to small.

With a combination of large CNC and manual lathes, we can handle jobs big to small.

Key cutting the ID and OD of parts is a specialty.

We have a fully equipped fabrication shop with AWS certified welders, experienced mechanical engineers and a large paint booth if your job requires more comprehensive services.
