## **Granutech ships mobile industrial shredders to Defense Logistics Agency for overseas military base deployment**

**Grand Prairie, TX May 14, 2014** -Granutech-Saturn Systems, a world-leading manufacturer of industrial and mobile shredders and other recycling equipment announced it has sold an additional three of its mobile shredders to the US Military, through the Defense Logistics Agency. The additional dual-shaft Saturn shredders have recently been deployed and will be used on military bases overseas in locations that include Okinawa, Guam and Hawaii, "The military has over 10 of our mobile shredders so far, and we are pleased to be able to continue to meet needs for recycling on US bases around the world", said Matt Morrison, VP for Granutech-Saturn Systems.

### **Product Features & Benefits**

The Saturn dual-shaft mobile shredder uses a diesel/hydraulic drive system, and will be used to decommission a wide variety of materials present on military bases. Granutech had to innovate to meet specific military goals for weight, size, portability and throughput capacity while also meeting Tier IV emissions requirements.
